UNUSUAL JEALOUSY REVEALED BY MURDER

August Lehoesky, Who Was Shot by Wife's Former Husband, Dies of Wounds.

The sullen jealousy of midlle age wrought a strange tragedy in the death of August Lehoesky, 49 years old, who succumbed at the city hospital today to the bullet wounds inflicted Saturday afternoon by Michael Muvesz, 55, former hus-band of the 50-year-old woman whom Lehoesky married two weeks

Muvesz had left his wife and parried another woman, and the wife says she got a divorce, and two weeks ago married Lehoesky, a shoe worker, in order to have a home. They lived at 4328 Gano avenue, and Muvesz and his second wife lived at 3670 Hickory street. The wide district separating these neighborhoods did not keep them from meeting at the home of Muv-esz's daughter, at 4224 Shenandoah avenue, where the fatal quarrel oc-

Statement of the Widow.

Mrs. Lehoesky, as told yester day, said after the shooting that Muvesz deserted her in Hungary in 1897, and that he came to the United States in 1993, and later sent for her and their child. She brought the child here, and finding that he was living with another roman, she refused to return to dim. She worked and reared her daughter, who is now Mrs. John Kurusz. She and Muyesz saw each other occasionally at the daughter's home on Shenandoah ayenue, but had nothing to say to each

She said Muyesz and Lehoesky recent marriage; which was on Feb. 15, and the former husband made a contemptuous remark to

134 CARTONS OF JELLIES AND JAMS SEIZED HERE

Products Shipped From Highland, N. Y., Alleged Not to Contain Required Ingredients.
United States food and drug inectors today confiscated 134 cartons of preserved strawberries and jellies at the plant of the United Drug Co., 3915 North Kingshighway, in a roundup of products shipped from the Hudson Valley Pure Food Co. of Highland, N. Y.,

to distributors in this territory. The seizure followed complain's om consumers and retail dealers hat the products did not contain the required fruit ingredients. Jelies and jams labeled strawberry and supposed to contain 45 per cer of fruit and 55 of sugar were found to contain only about 30 per cent of fruit, the remaining percentage al-letted to that ingredient being made up of tartaric acid, a product

made from grapes.

The products, it was reported were being sold at 23 and 24 cents a jar, while those complying with vernment specifications sell at 35

NO COLD TOMORROY IF YOU DO THIS NOW

At the first sign of a cold-that's the time to treat it.

Millions do it with hot lemonade. They take one when they first sus-

pect a cold. Then get into bed, under warm covers. In the morning, in nine cases out of ten all traces of the cold have

disappeared. This is the treatment that saves millions from pneumonia and the "flu"-those who didn't wait too

Just squeeze the juice of a lemon in a glass or cup of hot water. The effectiveness of hot lemonade is due to more than its heat. Add sugar if you wish. Get a dozen California lemons

now and keep them always in the house-ready for colds. They make the most effective lemonade for colds.

SEEKING HER TWO SISTERS

ll Were Born in St. Louis—Fa-ther Was William Gallagher,

Contractor. Seeking two sisters whom she has not seen in 25 years, Mrs. Elizabeth Conley Keys, 60 years old, of Los Angeles has arrived in St. Louis, where all were born and reared. She is staying at 2648 Washington boulevard.
The sisters are Mrs. Mary Ann

Joyce and Mrs. Margaret Curry. Because of the long separation, the only description of them which Mrs. Keys can give is that they are between 50 and 60 years old. The father was William Galla-gher, a contractor, long dead. Mrs. Keys as a girl sang in the choir of a Catholic church here. After her marriage she left St. Louis and thereafter had intermittent corre-spondence with her relatives. Her husband and son died in recent years, leaving her alone in the world except for the two sisters. She sold a rooming house in Los

Angeles and is using the proceeds in her hunt for her sisters. Policewomen are helping her here.
Mary Ann, she remembers, maried John J. Joyce, who was in the saddlery business, and they had, about 10 children. The family moved to Texarkana, Tex., some years ago, but is believed to have returned to St. Louis. Margaret married Daniel D. Curry, an engineer, and they, too, had a large

Then Pearl's Grandma came to the rescue. As Mrs. Laurent tells it:

"When Pearl was visiting her grandparents in Philadelphia last winter she caught a bad cough and cold. Usually her coughs hang on so that I could hardly believe it when Mother wrote me she was all right again. Mother had given her REM and just a half a bottle of it had stopped her cough.

Mother was so enthusiastic about REM that later on, when Pearl was back in New York, and needed some of it again and I wasn't able to get it in New York yet, she sent me a bottle by special

The surprising popularity of REM for coughs is due very largely to grateful users who have passed the

REM contains, among other things, a special ingredient (too expensive for old-style, slower-acting cough syrups) that makes it cling to your throat as you swallow. Spreading over the sore, inflamed membranes in a soothing, healing film, it quickly quiets the cough.

REM doesn't taste bad and it contains no Opiates. Your druggist has REM—ask him for it. You can have your money back if it doesn't help you. You're the Judge and Jury.

is in itself a serious ailment. The germs that cause it poison your system making you feel weak and ill all over, increasing your susceptibility to disease. To prevent sore throat—to cure it—give the tissues continuous antiseptic treatment—not just a gargle night and morning.

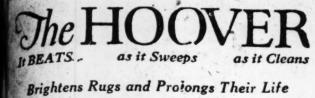

Carry Formamint with you, and at convenient intervals dissolve one of the pleasant tasting tablets in the mouth — every half hour or hour when the throat is sore, every two or three hours to prevent infection.

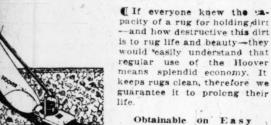

Formamint releases a powerful yet safe ntiseptic that keeps up the germicidal acon upon the throat tissues while the tablet is dissolving, and for some time after. This all-day-long treatment destroys throat germs as no spray or gargle can do. The condition then promptly clears up.

penances are a part of each indi-vidual's daily life are the ones who of all the world really rejoice. I will set the cloistered nun against your leading society lady and say, that the smile of joy is oftener on her face than on that of the lady who flits from pleasure to pleasure. There is an unequaled pleasure to present the same than the same transfer of the lady who flits from pleasure to ple ure to work that is done for God. The Archbishop cited the St. Vincent de Paul Society as an illusration of the phrase contained in the epistle of the day—"Needy and yet enriching many." A few hours pefore his sermon was delivered 50° members of the society had met in their quarterly communion at Holy Trinity Church, Fourteenth and Mallinckrodt streets. At business meeting which followed John R. Cooke, treasurer, reported that the society had spent \$13,40; during the quarter on provisions fuel, rent and other necessities for the poor. This is an increase of \$2876 over the expenditures of th revious quarter.

THE AUTO'S SILVER ANNIVERSARY.

St. Louis' eighteenth annual automobile show local and sectional importance. Of greater importance one place. is the fact that the automobile industry is this year observing its twenty-fifth, or silver, anniversary.

It is a Gargantuan story, this history of 25 years. It is too big for the imagination to grapple with. Metaphor wilts before the task. The story can be In 1899, the last year of the nineteenth century, 3700 automobiles were made. In 1923 more than 4,000,000 cars were produced. That is the highwater mark. The 1924 production slumped, the record being 3,500,000.

More impressive and informing are the registration figures. The 10-year period from 1914 to 1924 saw useless and hopeless if civilian opinion could not be registration leap from 1,711,399 to 17,740,000. An industrial miracle, truly. There are in the country now 17,000,000 automobiles, 20,000,000 homes and 24,000.-000 families. Sales reached their peak in 1923, and fell off last year. Expensive cars have not increased their sales since It was Fords and the like that did so well after the expensive cars reached their dead line. So someone who has been looking the matter up tells us, which makes ore understandable what we read about Mr. Ford's plans. Mr. Ford is putting his own ships on the sea, and he is building assembling plants in foreign countries. He is to have one in Japan. The Japanese have been a maritime people, but they will doubtless give the sea up for automobiling just as we have given up home and pretty much everything else for it. There is no place to run an automobile in Japan, but there will be. Given the car, you make a place to run it. MAXWELL

More for the Price Than You Ever Bought Before

The popularity of the new good Maxwell has simplified the buyer's task, for such marked public favor is sure indication of definite superiorities thoroughly demonstrated.

Some of these superiorities you will see at a glance the first time you look at a new good Maxwell. You'll note, of course, that in good looks, fine appointments and roomy comfort the new good Maxwell gives more than you were ever able to buy before at the price.

You'll learn, also, how the new good Maxwell is made and built, almost to the smallest detail - all in the great Maxwell plants. You'll appreciate how much that means in greater quality, reliability and economy.

But neither we nor any good Maxwell owner can give you an adequate idea of how much finer this car is in results than any four you have ever known. You must experience these results for yourself.

When you have driven the new good Maxwell 58 miles an hour, rushed from 5 to 25 miles in 8 seconds and enjoyed its remarkable ease of riding, you will begin to understand how superior in values this car really is. We are eager to prove these Maxwell superiorities in a demonstration.

Troubled With Pimples Two Years Cuticura Healed

" My skin began to itch and burn out on my face, shoulders and arms. The pimples festered and scaled over and my face looked terrible. My clothing rubbed against the pimples on my shoulders and caused them to bleed. The irritation caused me to scratch the pimples, and the scratching caused terrible eruptions. I lost my rest at night on account of the irritation.

Into Cold in Night Clothes. Fire in a four-family flat at 4056-58 McRee avenue forced seven occupants to flee in night clothing at 3 a.m. today, when the thermometer registered 11 above zero, while the other two occupants were slightly overcome by smoke and were carried from the build-

ng by firemen. Damage to the building was esti-mated at \$5000 and household ef-fects of the occupants were damand water. The fire originated in the basement.

A strong odor of smoke awakened L. A. White, who with his wife and son. Billie, 10, resided at number 4058, and he caused a neighbor to turn in a fire alarm. A hasty exit from the building, in scant attire, was made by Mr. and Mrs. Kennedy Byers of number 4056, Mr. and Mrs. J. A. Gilliam of number 4056A, and Mr. and Mrs. White and son, Mr. and Mrs. J. D. Rodgers of number 4058A were sclightly overcome by smoke and firemen carried them down a lad-der from the building.

Believing the fire to be extin-

guished at 4 a. m., firemen left, but were recalled a few minutes later when Gilliam returned to his apartment to learn what damage had been done and discovered a blaze in an inner wall. The residents spent the remainder of the night with neighbors.

Damage estimated at \$60,000 was caused by a fire of undetermined origin early yesterday in a garage at Tenth street and Market avenue. East St. Louis. The building, a frame structure, was burned to the ground and 15 automobiles A series of explosions caused by gasoline and alcohol storel in the building, made fighting of the fire extremely hazardous. There was keen rivalry between the two teams in yesterday's game and as a result two players were ejected from the contest for fighting. The incident occurred early in the closing period, when, after a verbal controversy, McCarthy, forward of the Mathews, McCarthy, forward of th

card of the Matthews, and Schurwan, fullback for the Henses started a fight and were banished by Referee Roche. McCarthy, on laeving the field, took several punches at one of the fans who had berated him.

The result of the game was something of a surprise, as the Henses were expected to give a better account of themselves, following the good showings made in the two fits gall.

Carthy hit the net for the third goal.

According to Joseph Bennett, later champion of England, this stroke on the modern table could not have been executed without a masse stroke, but Carr and Bartley found that they could achieve it on the crude, slow tables of their day with the application of a "side" stroke." Discovery Accidental.

Carr was the first to systemat ically apply this stroke. The discovery, it is apparent, was not made through any process of mathematical deduction based on the laws of motion, but was largely accidental. Carr, it is said, kept the secret to himself but, naturally, his

Our country cannot live half prosperous and the other half bordering on poverty. We cannot have real prosperity unless all kinds of business and all classes of our population share in it. None of us can afford to benefit at the expense of others. We

All branches of economic activity are inter-dependent. We need prosperous factos in order that raw materials may be turned into finished products most efficiently and cheaply. We need prosperous farmers and laborers because these influential and productive factors of our population must have money in order to purchase the goods and services which the rest of us have to offer. We need prosperous railroads because no other kind can render the adequate, efficient service essential to the carrying on of

for prosperity. The railroads contribute largely to general prosperity through their

essential service and their vast expenditures, and they know that the best interest of

the public, in turn, is to be found in railway prosperity, for that is what insures con-

One of the quickest ways to halt general prosperity would be to cripple the railroads. But we do not believe the country stands in danger of that since the public has

become better informed on the railway question. Public sentiment toward the rail-

roads has undergone a great change in recent years. There once existed a feeling of

hostility and distrust which is now largely gone. Many things have helped to produce

that improvement, including a change in the attitude of railway managements toward

the public. The one thing that perhaps has done more than anything else to bring

about the change is the wider knowledge of the fact that the railroads perform a vital

service which, in the public interest, must be maintained through allowing them to

Railroads are subject to all of the mistakes of policies and practices that other human agencies are subject to. But railway managements are keen to correct abuses and

New Issue

\$2,500,000 Standard Milling Company

(A New Jersey Corporation)

First & Refunding Mortgage & Lien Twenty - Year 51/2% Gold Bonds

NATIONAL BANK OF COMMERCE IN NEW YORK, Trustee

As a Sinking Fund for these Bonds the Company will agree to retire on or before March 11, 1926, and on or before March 1st of each year thereafter, \$75,000 principal amount of Bonds (by redemption by lot or by purchase at not exceeding the current redemption price).

The Company will agree to refund to holders of the Bonds, resident in such states, respectively, upon proper application within 60 days after the payment thereof, the Pennsylvania 4 Mills Tax, the Maryland 4½ Mills Tax, the Connecticut Personal Property Tax not exceeding 4 mills per dollar per annum, and the Massachusetts Income Tax on the interest not exceeding 6% of such interest per annum.

Information in regard to the Company and this issue of bands is given in a letter from Mr. A. P. Walker, President of Significant Willing Company, copies of which may be obtained from the undersigned and which he has summarized in part as follows. BUSINESS

"Standard Milling Company, with its subsidiaries, is one of the largest flour milling concerns in the world. The daily capacity of its mills is approximately 40,000 barrels. Its branded products, many of which have been on the market for sixty or more years, have been extensively advertised and are widely and favorably known. Its properties are strategically located to meet the important requirement of balance between accessibility to the wheat growing areas and nearness to the market for flour.

The flour milling industry is attractive for investment because of the steady and increasing demand for the product which is one of the primary necessities of life, the economies which may be effected by large scale production, the protection from risk of inventory loss by the process of hedging, and the liquid nature of the inventory.

SECURITY

These Bonds, in the opinion of counsel, will be secured by a first mortgage upon a part of the properties and by a first lien upon the stocks of certain of the subsidiaries owned by the parent Company; and upon the retirement of \$3,618,000 first mortgage bonds due 1930 (for the refunding of which provision will be made in the new Mortgage), by a first mortgage on all of its fixed properties except for purchase money and existing liens on property hereafter acquired and by a first lien on all of its stocks of subsidiaries The subsidiaries have no mortgage debt outstanding with the public except one issue of \$262,500, and the Company will covenant that it will not permit any of them to create any mortgage or issue any debt, except current debt incurred in the course of current business operations and except for pledge under the Mortgage securing these Bonds Company's outstanding \$1,500,000 Six Percent Three-Year Gold Notes due 1927 will be secured equally and ratably by the new Mortgage.

The new Mortgage will authorize \$12,000,000 of Bonds including this initial issue of \$2,500,000. Additional Bonds may be issued to the extent of \$5,380,500 for the retirement of the Company's \$3,618,000 mortgage bonds and \$1,500,000 three-year notes and of the \$262,500 subsidiary company bonds. The remaining authorized Bonds may be issued for not to exceed 75% of the cost or fair value of subsequent acquisitions or improvements, provided that the average annual consolidated net earnings of the Company for the three years preceding the issue of Bonds shall be

PURPOSE OF ISSUE

The proceeds of the sale of these Bonds will be utilized to retire indebtedness incurred in the construction of a new warehouse in Jersey City and in the purchase of the stock of The H-O Cereal Company, Inc., and to increase the Company's working capital.

EARNINGS

The annual average for the five years ended August 31, 1924, of the consolidated earnings of the Company, available for interest charges on the Company's funded debt, as certified by Messrs. Lybrand, Ross Bros. & Montgomery, was \$1,737,599.03, or equivalent to more man 4 times the interest requirements on the Company's entire funded debt to be outstanding after this financing. These earnings are after deducting adequate depreciation and all prior charges, but before deducting Federal income and profits taxes paid. For the year ended August 31, 1924 such earnings were \$1,456,942.87. Since August 31, 1924 both the sales and the carnings of the Company have been greater than in the corresponding period of the previous year and the Company looks forward to continued good business in the coming year.

The A. E. Baxter Engineering Company, one of the best known milling engineers in the United States, has valued the fixed assets of the consolidated Company as of January 1. 1925, after adequate depreciation, at in excess of \$15,000,000. This figure does not give any consideration to the Com-pany's valuable hydraulic rights.

The consolidated balance sheet of the Company, as of August 31, 1924, the close of its fiscal year, as cerufied by Messrs. Lybrand, Ross Bros. & Montgomery, after giving effect to the purchase of the stock of The H-O Cereal Company, Inc., the sale of these Bonds and the application of their proceeds as above set forth, shows current assets to be \$13,406,876.36 against current liabilities of \$4,228,359,82. or in the ratio of more than 3 to 1. Net current assets amounted to \$9,178,516.54 or in excess of the Company's total funded debt of \$7,925,500.00. The Company's preferred and common stock represent a market equity of approxi-mately \$13,400,000.00."

Application will be made in due course to list these bonds on the New York Stock Exchange.

Price 9534 and accrued interest, to yield about 5.86%

This offering is made in all respects when, as and if issued and accepted by us and subject to the approval of Messes. Sallivan & Cromwell, of New York. We reserve the right to reject any and all subscriptions in whole or in part, to allot less than the amount applied for and to close the subscription books at any time without notice. It is expected that delivery of temporary bonds or interim receipts will be made on or about March 11, 1925, at the office of Goldman, Sachs & Co., 30 Pine St., New York, N. Y., against payment therefor in New York funds.

THE BANKING HOME

9 50,000 Number Real Estate There are comparatively few banking institutions whose services to customers extend as far as the field of general real estate. The Mississippi Valley Trust Company is one of the few. Whether you desire to purchase a home, or whether you have one you would like to sell; whether you wish to rent an apartment or whether you have property to be rented and managed; whether you need a loan on real estate or whether you are looking for a safe investment-you will find the Mississippi Valley capable of rendering you the most effective There is another important consideration: While our Real Estate Department offers all the services of an independent agency, yet it is a part of the Trust Company and must ever adhere to the same high standards of business integrity that justify the confidence of over fifty thousand customers. You are invited to make use of this or any other of our many departments.

MEDITATIONS MARRIED WOMAN

By HELEN ROWLAND "FORGIVING" A MAN.

WOMAN is always "FORGIVING" a man for something! Man must admire the quality of "forgiveness" in woman-

for he never neglects a chance to give her an opportunity to exercise

He will always agree to "forgive and forget" if the woman will do all the forgiving and LET him do the forgetting.

Half the time a man never suspects that he is being "forgiven," nor has the faintest idea of what he's being forgiven for.

. When a woman twines her arms around his neck and murmurs half-tearfully, "Oh, well, he's a daning, ANYHOW!" he is utterly dumfounded. He KNEW he was "a darling"-so why mention it?

It's a cold shock to him to come in all aglow with a box of narcissus, a pair of theater tickets and the conviction that he is making a big hit with a woman, only to discover that he is being "forgiven" for not noticing that she has done her hair in a new way

But, the most exasperating thing of all, is to have her forgive him for something she suspects that he's GOING to do before he's done it-and thereby take all the kick out of it!

A man is always asking a woman's forgiveness-and then wishing she'd stop deluging him with it.

Lots of times a woman insists on forgiving a man when he doesn't want to be forgiven. All he wants is to do something so "unforgivable" that she'll let him alone!

A man can't HELP it if a woman insists on falling in love with him; if she persists in trusting him; if she insists on hanging illusions around him-magnifying and glorifying and sanctifying him.

And, after she has done all this, and discovered her mistake, it's maddening to have her come around and "forgive" him for being a

From the day a man is born, SOME woman is always forgiving him for some thing! The little girl forgives him for pulling her hair and breaking her dolls; later, she forgives him for trampling all over her dancing slippers; and still later, she forgives him for trampling all over her finer sensibilities, her illusions and her love of beauty.

She forgives him for kissing her-and for forgetting to kiss her. For lying to her-and for telling her the brutal truth. For deceiving her-and then for UNdeceiving her!

She will forgive him for burglary, arson, mayhem, murder-for anything on earth-but not for falling in love with her! Or falling in love with some OTHER woman!

And, if she can't find anything new to forgive him for, she'll go right on forgiving him for something he did years ago!

It's no use! Woman was born to "FORGIVE" man and he can't STOP her!

Her days are spent gazing at the person she sees in the mirror; but the glass in her telescope is kinda poor-not powerful like the mighty thing on the top of "Lick," nor a microscope like the jewel-like instrument in the laboratory. For she never sees the flaws in the lady And it is "selfishness"

And, by George, there aren't many flaws to spy IN her after all contemplation of self-burns incense of praise before her imagethese years of devotion to self! Hair perfect, shining like a well-cared-for racer's coat; sparkling

in the sun when she goes without a hat. Teeth like the grains of young ears of corn, so even, so white, so

Skin like the heart-petals of a tea-rose. Lips smooth as silk. Hands like white velvet, with nails to tip them off with a perfect pearly pink. that, maybe I'd burn the incense, too, and do a little inward star-gazing Clothes-exquisite-always fresh-always sweet-smelling-always myself!"

Now, all of this takes time! As a girl who hardly has time to watch with an eagle and despairing eye the runs in her stockings knows! But there's one fleck in the work of art. One fault.

It lies too deep for the finding even-let alone the repairing of it. Of course. You could guess that. For when a creature sits in rapt

sees herself doubled and trebled not once but a myriad of times-for all the hours that she's awake, she can't be bent the other way after growing ONE way so long-and learn to think of anybody else

But the homely girl who agonizes to be beautiful looks at the beauty and greans. "I can't hardly blame her-you know. For if I was as lovely as

LUNGER the Osprey, more often called Fish Hawk, and . Mrs. Plunger had gone only far enough south to be sure of good fishing during the winter months. They didn't like to go south. They are great home lovers and they would have liked to have stayed there on the edge of the Green Forest close to Farmer Brown's all through the year.

All the time they were away their thought was of home, and so you may be sure that they started for home just as soon as "But they are good neighbors they dared to. There was a certain place much for the tree. In a heavy from which always in years past gule the tree had gone crashing they had first seen the old home to the ground, carrying the great tree with the big nest in it. When they reached this place this time "I wonder what Plunger and both strained their eyes. Then WHOLE FLAKE Mrs. Plunger will do now?" said Plunger looked at Mrs. Plunger, Chatterer the Red Squirre, as he and there was a question in that

The tree and the nest were "Probably they'll move away," gone! At least the Ospreys could

know what to make of it. How they did hurry! When they were near enough of course they saw the nest on the ground with the broken tree. At first Mrs. Plunger couldn't be comforted. She flew around and around over the spot where the nest had been, all the time crying mournfully. She felt just as you would feel if you should come home and find your house all knocked to pieces. Yes, sir, that is the way she felt. Plunger felt almost as badly.

"What shall we do?" cried Plunger. "Shall we build another ome over nearer the Big River?" "Don't ask me any questions now," replied Mrs. Plunger. "I cannot decide anything yet. Oh dear! Oh dear! It is dreadful

to lose a home like this!'
